## **Reasons for Allowance**

Applicants' response to the last Office Action, filed on January 31, 2005 has been entered and made of record.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 7, 20, 22, 27, 33, and 37 are allowable over the prior art of record. Claims 3-6 and 21, 8-19, 21, 24-26, 32 and 42, 28-31, 34-35, 38-39 and 41 depend from claims 1, 7, 20, 22, 27, 33, and 37 respectively, therefore, are allowed.

Independent claims 1, 7, 22, 27, 33 and 37 recite the limitations of : reconstructing spectra of the first scene (first set of channels) to satisfy a error criterion or under error tolerance. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

Independent claim 20 recites the limitations of: determining which aspects of the captured estimated spectral resolution are signature of original color levels and estimating spectral resolution data are signature of deterioration artifacts based on stored image information; and correcting the captured estimated spectral resolution data which are signatures of deterioration artifacts. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

Application/Control Number: 09/972,223

Art Unit: 2623

The closest references of articles to Berns et al. and Maitre et al. (combination) discloses the method for spectral imaging with high resolution image data. However, they do not teach the limitations of cited above.

In view of the amended claims and the Applicant's arguments, the rejections to claims 1, 3-6, 14, 18, 22, 24-26, and 42 are expressly withdrawn.
